

Composting has arrived at Holly Springs!

We now have two **Green** collection bins for compostable materials:

- Across from the bike rack in the Visitor Parking Lot
- Under the stairs by Unit 57

Seal up your Green Bin acceptable materials in **Compostable** bags and deposit them in the bin nearest you!

Only **Compostable** Bags should be used (not plastic grocery store or produce bags) and they will have a certified compostable logo on them:

What can you Compost?

Meat, fish, shellfish and bones

Eggshells and dairy products

Breads, noodles, rice, beans and grains

Fruits and vegetables

Plate scrapings

Jams, sauces and cooking oil

Coffee filters and tea bags

Paper plates and napkins

Please do not add yard waste (grass, plants, cuttings from pruning etc.) to the compost bins.

The lids on the bins are a little heavy and the Board appreciates your patience as we work through different options as we move forward.

Don't forget about placing your recyclables (cardboard, plastics, metal, and paper) in one of the three Recycling bins located by each entrance and by the Overflow Parking Lot.

Thank you in advance for participating in our Composting and Recycling Programs.
